An Invitation to Join
Paper Industry
Producers & Suppliers

A Productive Partnership
Industry • University • Students

Invest in Your Future . . .

You are invited to join the University of Maine Pulp & Paper Foundation

The University of Maine Pulp and Paper Foundation was established in 1950 by paper and related industries to attract capable people to study engineering at the University of Maine and to strengthen the faculty who taught paper related courses. Since then the Foundation has provided full tuition scholarships to more than 1,500 students in a wide variety of engineering disciplines including: biological, civil, chemical, electrical, mechanical and other engineering and engineering technology disciplines offered at the University's Orono campus.

Support Our Strategy for Success . . .

As a manager you need capable associates to meet your goals, people who are well educated in engineering fundamentals, with current computer skills and a strong work ethic who take pride in their results and your success. **That is why your company should join the University of Maine Pulp & Paper Foundation as a partner building the industry's human resources strength.** By participating in the Foundation's committees and programs you can impact the content and quality of the education required for your future employees while extending your professional network.

For a more complete description of our programs and activities we invite you to explore our web site at www.maineulpaper.org.

Here's what our current members say ...

By participating in the Foundation you have access to some of the top decision-makers in the industry. You have the opportunity to recruit students, shape their education to fit your requirements, and select quality engineers to participate in meeting business goals. - *Mill Manager*

The co-op program provides engineers in training to solve problems that often go untended, at very low cost and allows us to pre-interview future employees.

-*VP Industry Supplier*

I would never have considered making a career in the paper industry had I not had a full scholarship to pay for my Master's degree which led to a 40-year association with our industry.

-class '61 graduate

Pulp & Paper Foundation Facts . . .

- Oldest pulp & paper foundation (established 1950)
- University with most accredited engineering disciplines serving the paper & supplier industry
- Most alumni in the paper industry
- Most scholarships granted to undergraduates
- High school recruitment program attracts top 10% students through "Consider Engineering" summer program offered to 60 students without charge
- Graduating student resumes are on line for Foundation members only

Your Company's Membership in The University of Maine Pulp & Paper Foundation provides the following . . .

- **Full Tuition Scholarships** for high achieving undergraduate students.
- **A pool of motivated, capable engineering graduates** with summer and/or co-op job experience who want to work for the paper industry's producers and suppliers.
- **Cost effective recognition** and visibility for your company in all publications including the annual Maine Paper Directory.
- **Grants for state of the art computer systems and stipends** to encourage faculty who are responsible for teaching paper related classes and undertaking paper industry related research.
- **Invitations to our annual "Open House"** event as well as regional mini-open houses for members only offering networking opportunities not available elsewhere.
- **Opportunities to meet faculty and students** to comment on their curriculum and research activities.
- **Favored access to the UMaine Process Development Center** pilot plant widely used by industry clients for process and product development.
